

Stolen Vehicle Recovery

Protecting what matters

Tracker^{///}

An aerial photograph of a dark asphalt road that curves in a figure-eight pattern through a dense forest. The road is surrounded by green trees and some sandy or light-colored patches. A small white car is visible on the road, positioned in the lower curve of the figure-eight.

The reality of vehicle theft

Vehicle theft affects thousands of people each year, but the impact is wider than just losing your vehicle – there are both financial and emotional consequences.

The consequences of vehicle theft

- Loss of insurance excess
- Loss of no-claims bonus
- Car hire costs
- Insurance settlement delays
- Insurance premium uplift
- Cherished plate re-registration delay
- Personal inconvenience and distress

Why should you choose Tracker™?

- Market leading stolen vehicle recovery service provider
- Trusted for over 25 years
- Unique relationship with all UK police forces
- All products accredited by Thatcham
- Over 1 million Tracker™ devices fitted
- Only system with GPS/GSM anti-jamming measures
- Over £550 million worth of stolen vehicles returned to their rightful owners

All Tracker™ products benefit from:

Digital Very High Frequency (VHF) Tracking - Military-grade patented technology that allows police to locate a vehicle, even when concealed in metal containers or underground car parks

Nationwide support from all UK police forces

Mesh network - Tracker's™ patented network technology allows an activated device to be located by using other passing Tracker™ vehicles to identify reply codes

Unique tracking that is not affected by criminals' GPS/GSM signal jammers

Mainland UK Theft Recovery Service*

Full 12-month warranty

European coverage**

24hr Secure Operating Centre

Covert installation from accredited installers

*Terms and conditions apply

** Partial or full depending on product purchased

Tracker™ offers FOUR superb products for peace of mind

Battery Powered Retrieve

With its own in-built power source – Battery Powered Retrieve overcomes the issue of power drain on your asset's battery, even if it's left unused for a long period of time. Because Battery Powered Retrieve doesn't need to be wired into the electrical system, it can be installed into a wider range of vehicles, in many different locations, making this the ideal protection for your asset.

- Long battery life with up to 5 years standby
- Easily installed in vehicles or non-powered assets
- High tech tracking technology that is not affected by GPS/GSM signal jammers
- One-time use operation*

Monitor

In the event of a theft where the vehicle is moved without the ignition turned on, the motion sensor within Monitor will alert Tracker™, who will in turn notify you. On confirmation of theft and receipt of your Crime Reference Number, we will activate the unit, which will begin to emit a silent signal, allowing the police to track your vehicle to its exact location - thanks to Tracker's™ proven VHF technology.

- Motion sensor to detect unauthorised movement
- Vehicle battery disconnect alert
- Back-up battery in the event of theft

Locate

A ground-breaking system with 'jamming' countermeasures to create the ultimate defence against vehicle theft. Locate combines VHF with GPS and GSM technology making this system far more resilient to this form of attack. Crucially, if there is an attempt to jam the communication system, our VHF technology will ensure your vehicle can still be tracked to its exact location.

- Unauthorised movement alert
- Backup battery in the event of theft
- Access to Tracker™ app
- Notifications if your battery is disconnected or running low

S5 Plus

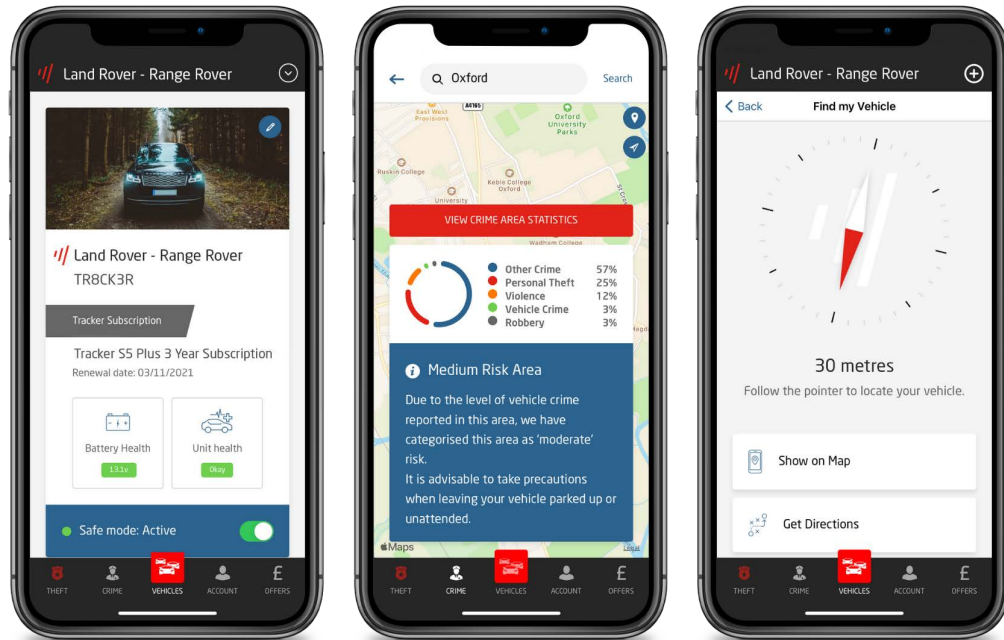

S5 Plus meets vehicle insurance requirements by operating to the Thatcham Category S5 standard. S5 Plus is designed to identify whether or not a driver is authorised to use the vehicle through the usage of driver tags. If a tag is not present when the vehicle is started, an alert will be generated, and you will be contacted to confirm the vehicle's location.

- Unauthorised driver alert with Driver ID tags
- 24/7 alert monitoring via the Secure Operating Centre
- Access to Tracker™ app
- Compatible with all hybrid and electric cars
- Notifications if your battery is disconnected or running low
- Back-up battery in the event of theft

*In the event of a theft, you will be required to purchase a new unit and the remaining subscription can be transferred.

Vehicle tracking at the touch of a button

Tracker Touch is a free, easy to use app that brings the power of Locate and S5 Plus to the palm of your hand. Stay connected and in control, with 24/7 visibility of your vehicle's location and the ability to manage your account.

Key Features

Geofence Area

As an additional security layer, you can set multiple Geofence Areas by defining custom perimeters such as your home and work. If your vehicle breaches an activated perimeter, you will receive an alert.

Theft Reporting

Using the Tracker Touch app, all you need to do to get in contact is click 'Call Tracker'.

Trip Tracker

All your travels are tracked and documented within the Tracker Touch app, so you can share the routes you've taken and even review detailed information, such as distance and time.

Crime Rating Area

Use the Tracker Touch app and discover vehicle crime ratings based on where you live and where you've parked.

Multi - Vehicle

Tracker Touch allows you to register and view multiple vehicles on a single log-in, enabling you to manage all your vehicles in one place.

System Health

Monitor the health of your Tracker system at any time from your Tracker Touch app.

Battery Health

Keep an eye on the health of your vehicle's battery to avoid unnecessary breakdowns.

Find My Vehicle

When your mind goes blank and you can't remember where you parked, the Tracker Touch app will navigate you back to your vehicle, getting you on your way as soon as possible.
