6 What will you have to pay us for this service?

We do not charge a fee for our services.

Commission and Interest Rates:

Normally we will receive a commission fee from the lender if you decide to enter into an agreement with them. You may ask us for details of any such fee at any time (either before or after entering in to any agreement.)

There are various commission fee models used which will depend on the agreement we have with the lender or broker.

The commission and rate model we have with most of the lenders is a risk based / 'rate for risk' criteria for setting lending rates and paying a commission fee. Some lenders may also use a 'fixed interest rate' model for setting lending rates and paying a commission fee instead.

For most of the lenders we work with, the commission fee is usually a fixed percentage of the balance borrowed. Occasionally this fee may be a fixed flat fee instead.

Fixed percentage commission explained: The broker will be paid a percentage of the amount you borrow as a commission fee. This means the more you borrow, the higher the commission fee. However, the commission fee will be the same no matter what the interest rate and monthly repayment amount.

Flat fee commission explained: The broker will be paid a set amount of money as a commission fee. This means no matter how much you borrow the commission fee will be the same. The commission fee will be the same no matter what the interest rate and monthly repayment amount.

We treat all customers fairly by offering the same best / starting rate and agreed rate model to all customers. The commission fee may vary between lenders. However, the amount we received as a commission fee from that lender does not affect the interest rate or amount of your repayments to that lender.

Incentives may include marketing support from time to time from some lenders.
